Special Announcements

EURO Support for NATCOR Bursaries
IFORS Developing Countries OR Resources Website
EURO Scholarships for ELAVIO 2017, Buenos Aires and Mireamar, Argentina, 24 February - 4 March, 2017
Joint EURO/ORSC/ECO International Conference 2017 on Combinatorial Optimization (ECO XXX), Koper, Slovenia, 3-6 May 2017

Working Groups

EURO Working Group Methodology for Complex Societal Problems. 9th International Conference on Economics and Management. Warsaw, Poland, 13-14 January 2017
EURO Working Group on OR for Development. ICORD 2017. Québec, Canada, 13-14 July, 2017
EURO Working Group on Transportation. 20th EURO Working Group on Transportation Meeting. Budapest, Hungary, 4-6 September, 2017

Conferences and Meetings

UK Operational Research Society (ORS). Young to OR 20 Conference. London, UK, 4-6 April, 2017
Operations Research Society of Israel (ORSIS). POMS International Conference in Israel. Tel Aviv, Israel, 27-29 June, 2017
German Operational Research Society (GOR). OR 2017. Berlin, Germany, 6-8 September, 2017
ICAPS 2017 (27th International Conference on Automated Planning and Scheduling). Pittsburgh, USA, 18-23 June, 2017
Schools and Courses

Winter School on Optimization and Operations Research. Zinal, Switzerland, 15-20 January, 2017
Winter School in Stochastic programming with Applications in Energy, Logistics and Finance. Passo del Tonale, Italy, 15-21 January, 2017

Publications

EURO Journal on Transportation and Logistics (EJTL). Special Issue: Call for Papers on Advances in Vehicle Routing and Logistics Optimization: heuristics
EURO Journal on Transportation and Logistics (EJTL). Special Issue: Call for Papers on Advances in Vehicle Routing and Logistics Optimization: exact methods
European Journal of Operational Research (EJOR). Special Issue: Call for Papers on Applied to Humanitarian Operations
Discrete Applied Mathematics, Special Issue: Call for Papers on Computational Advances in Combinatorial Optimization
European Journal of Operational Research (EJOR). Special Issue: Call for Papers on Extending the OR Horizons
Annals of Operations Research. Special Issue: Call for Papers on Advances in Theoretical and Applied Combinatorial Optimization
Group Decision and Negotiation. Special Issue: Call for Papers on Micro-Processes in Group Decision Making
RAIRO-Operations Research. Special Issue: Call for Papers on Operations Research Applications in Industry

Competitions, Prizes and Awards

IEORS Prize for OR in Development
EURO Working Group on Sustainable Supply Chains. PhD Thesis Award on Sustainable Supply Chains
VeRoLog solver challenge 2016-2017

Upcoming Conferences

Special Announcements

EURO Support for NATCOR Bursaries

NATCOR, a National Taught Course Centre in Operational Research, delivers taught courses in the UK to PhD students on a number of different topics in OR. Please see the NATCOR website for more details: http://www.natcor.ac.uk/

EURO is pleased to announce the availability of a limited number of bursaries for PhD students to attend NATCOR courses. https://www.euro-online.org/web/pages/1568/natcor-bursaries

- Stochastic Modelling, Lancaster University - 3rd - 7th April 2017
- Simulation, Loughborough University - 10th - 14th July 2017
- Combinatorial Optimisation, University of Southampton - 4th - 8th September 2017

The NATCOR course fees and accommodation (typically bed and breakfast) will be funded by EURO for successful candidates.

Applicants must be PhD students, from one of the EURO member countries or studying in one of the EURO member countries. (see https://www.euro-online.org/web/pages/1457/current-member-societies). Applicants must have good English Language skills as all NATCOR courses will be in English. Preference will be given to students in their first or second years but all are welcome to apply. Preference will also be given to applicants who have not previously received support from EURO for NATCOR or other PhD schools.
To apply for a bursary, candidates from a EURO member society country, or studying in a EURO member society country, should submit a zip file containing the application form, their curriculum vitae (including their academic track record), a letter outlining their motivation to attend, and a letter of recommendation from their supervisor to https://www.euro-online.org/awards/nacor2017/registration.php. Applicants should declare on their application if they are receiving any additional support from their PhD funding body or other sponsor.

Important Dates
Deadline for applications: January 16, 2017
Notification of acceptance: January 30, 2017

**IFORS Developing Countries OR Resources Website**

Welcome to the IFORS Developing Countries OR Resources Website
http://ifors.org/developing_countries/index.php?title=Main_Page

The aim of the Developing Countries On-Line Resources page is to offer the OR worker all publicly-available materials on the topic of Operations Research for Development. It also aims to provide a venue for people who are working in the area to share their completed or in-process work, learn from others, and stimulate comments and discussions on the work.

The IFORS activity links with that of the EURO Working Group on OR for Development. This has been a classical connection reflected both in and around all our last EURO and IFORS conferences.

And ("free", not prevented by copy-right, etc.) submissions to IFORS DC online resources by EURO friends are very much welcome, especially.

---

**EURO Scholarships for ELAVIO 2017**

Buenos Aires and Miramar, Argentina,
24 February - 4 March, 2017

EURO is pleased to announce the travel-sponsorship of two participants to join the XXI ELAVIO - Latin-American Summer School in Operations Research. The XXI ELAVIO will take place in Argentina from February 24th to March 4th, 2017, in the cities of Buenos Aires and Miramar.

The ELAVIOs are schools supported by ALIO (the Latin-Iberoamerican Association of Operations Research) and IFORS and are mainly addressed to young researchers and postgraduate students (both at the PhD and master level) from Latin-Iberoamerican countries. However, Ph.D. students from all over the world with excellent skills and special interest in the areas of Operations Research, Computer Science, and Applied Mathematics are also welcome to apply.

ELAVIO XXI will be held in 2017 in Argentina from February 24th to March 4th, in the cities of Buenos Aires and Miramar. Located 450 km (280 mi) south of Buenos Aires on the Atlantic coast, Miramar is an attractive tourist destination known for its beautiful beaches and a wide range of cultural and culinary attractions that should significantly enrich the experience for participants. Hosting the event will be the University of Buenos Aires, Argentina's main centre for scientific and academic activity. The contact for organizational matters is Prof. Guillermo Durán (gduran@dm.uba.ar).

Registration for ELAVIO XXI and the Opening Ceremony will take place on Friday, February 24th at the University, in Buenos Aires City. Various talks and a poster session will also be held that afternoon. The weekend will be free to take in the sights of the city, and on Sunday afternoon a bus chartered by the School will transport invited professors and students to Miramar. Over the following 5 days, a range of mini-courses and tutorials on advanced topics of specific interest will all be held at the Alto Miramar Resort & Spa (http://www.altomiram.com.ar/site/). Closing Ceremony will take place on Saturday morning, and that afternoon the bus will transport back all the participants to Buenos Aires.

ELAVIO 2017 will include mini-courses, invited talks, as well as discussion panels where participants can share their
Joint EURO/ORSC/ECCO International Conference 2017 on Combinatorial Optimization (ECCO XXX)
Koper, Slovenia, 3-6 May 2017

http://ecco2017.euro-online.org/en/

The 30th Anniversary conference ECCO XXX - 2017 will be a joint EURO/ORSC/ECCO International Conference on Combinatorial Optimization.

It will be organized and hosted by the University of Primorska and its Faculty of Mathematics, Natural sciences and Information technologies, and Andrej Marusic Institute.

The conference will be held, on May 3-6, 2017, in the medieval town of Koper, Slovenia, located on the Mediterranean coast in close proximity of many touristic hotspots (like, e.g., Venice, Ljubljana, Skocjan Caves)

Plenary Speakers
Robert Bixby
Xiaotie Deng
Bernard Ries
Gerhard Woeginger

Important Dates
Conference website online: Nov. 1, 2016
Abstract submission closes: March 1, 2017

Program Committee
Pre-Congress Tour
A special pre-congress tour to Venice on May 2, 2017 (including transfer to Koper on May 3, 2016) will be offered to interested participants. For detailed information check the conference website.

Special Issues
Two special issues (Discrete Applied Mathematics, Journal of the Operations Research Society of China) will be dedicated to the conference.

21st Conference of the International Federation of Operational Research Societies
IFORS 2017
Québec City, Canada, 17-21 July, 2017

OR/Analytics for a Better World
http://ifors2017.ca/

The 21st triennial conference of the International Federation of Operational Research Societies will bring together operational researchers from around the globe to discuss the full spectrum of topics in OR.

The Convention Centre that will host IFORS 2017 is conveniently located in the heart of Québec City, at walking distance from its UNESCO World Heritage historic center.

Outstanding plenary speakers and keynote speakers, who will deliver tutorials on a variety of topics will make the conference a memorable scientific event.

All researchers, academics, practitioners, and students interested in all branches of operational research are invited to participate to IFORS 2017 by submitting an abstract, or organizing a session or a stream of sessions.

Abstract submission will be open from November 1st to February 10th, 2017.

IFORS 2017 is an exciting international forum and a great opportunity to meet new and old friends and colleagues from all over the world.

We look forward to meeting you in Québec City in 2017.

Irène Abi-Zeid
M.Grazia Speranza

Working Groups
Warsaw, Poland, 13-14 January 2017

We are proud to announce that the International Research Society on Methodology of Societal Complexity has established a new research group in Iran:

the Iran Research Society on Methodology of Societal Complexity, Tehran, Iran

Chair:
Dr Ahmad Shabanifard (Ph.D.)
CGU president; World Bank honored contributor
Bioethics committee member of UNESCO
Tehran, Iran, myeuniversity.se icoac.ir

Board members:
Prof. Dr Hamidreza Alipour,
Islamic Azad University, Rasht Branch, Tehran, Iran
Department of Management & Economic, Islamic Azad University, Rasht Branch, Iran
Tel: +989111311776
Alipour@iaurasht.ac.ir
Prof. Dorien DeTombe, Chair International Research Society on Methodology of Societal Complexity
Amsterdam, The Netherlands, Europe
University, Chengdu, China
DeTombe@nosmo.nl
www.dorientdetombe.nl

We are organizing a conference in Warsaw, Poland, 13-14 January 2017, the 9th ICOAC conference.

EURO Working Group on Network Optimization

8th International Network Optimization Conference (INOC2017)

Lisbon, Portugal, 26-28 February, 2017

http://inoc2017.fc.ul.pt?

The 8th International Network Optimization Conference will take place in Lisbon, Portugal, February 26-28, 2017. The aim of this conference is to provide researchers from different areas of Operations Research, with the opportunity to present and discuss their results and research on the field of Network Optimization in an inspiring and bridge building environment where fruitful ideas may flow freely.

In this edition, the keynote speakers are:
W. Cook, University of Waterloo (Canada)
A. Martin, Friedrich-Alexander-Universität (Germany)
R. Möhring, TU Berlin (Germany)
A. Schrijver, Univ. of Amsterdam (The Netherlands)

The authors are invited to submit their papers describing original, previously unpublished research results and not currently under review. There are two types of submission: full papers (810 pages) and extended abstracts (12 pages). Accepted full papers and extended abstracts will be available in the conference material. Accepted full papers will be published in the Electronic Notes in Discrete Mathematics (ENDM), Elsevier. There will be a special issue of the Networks journal, Wiley, associated with the conference.

The important dates are:
ENDM paper submission deadline: November 15, 2016
Paper submission deadline: January 20, 2017
Acceptance Notification: January 25, 2017
Early Registration: January 31, 2017

INOC is the conference of the European Network Optimization Group (ENOG), a working group of EURO and the previous editions were held in Warsaw (2015), Tenerife (2013), Hamburg (2011), Pisa (2009), Spa (2007), Lisboa (2005) and Paris (2003). The conference is also part of the activities of the CMAFCIO (the Centro de Matemática e Aplicações Fundamentais e Centro de Investigação Operacional), University of Lisbon.
**ICDSST 2017**

*Namur, Belgium, 29-31 May, 2017*

https://icdsst2017.wordpress.com/

**Purpose of the ICDSST 2017**
The main purpose of the EWG-DSS 2017 International Conference on Decision Support System Technology (ICDSST 2017), with its main theme on "Data, Information and Knowledge Visualisation in Decision Making", is to attract researchers, developers and specialists in the related areas of decision making, including its methodologies and technologies, as well as application oriented practitioners directed to the implementation of solutions for societal challenges, to get together in order to exchange experiences and identify the key issues within the areas in focus, so that exploitation of new approaches and tools for future developments can take place. Depending on the research domain, frontiers between data, information and knowledge are not always very formally specified. Whatever the chosen definition, one will agree on the fact that the three of them are concerned with decision, decision making and decision support.

**ICDSST 2017 Main Theme**
This ICDSST 2017 will study the role, the qualities, the models and methods offered by visualisation of data, information and knowledge in the process of decision and the mechanisms of decision support. From data analysis, to knowledge sharing, going through information extraction, visualisation can offer key support to all the phases of a decision making process. In particular, in group decision, where communication is a critical aspect, an efficient visual support facilitates the process.

**Important dates**

**Full papers**
Submission: **30 November 2016**
Authors’ notification: 15 February 2017
Camera ready version: 28 February 2017

**Short papers**
Submission: **1 March 2017**
Authors’ notification: 10 April 2017
Camera ready version: 20 April 2017

**Poster Session**
Submission: **15 March 2017**
Authors’ notification: 10 April 2017
Camera ready version: 20 April 2017

Participation
Registration: May 8, 2017

---

**EURO Working Group on OR for Development**

**ICORD 2017**

*Québec, Canada, 13-14 July, 2017*

http://ifors.org/icord2017/

**Theme:** OR: Impacting Development

**Venue:**
Salle Power Corporation du Canada (3452)  
Carré des affaires FSA ULaval-Banque Nationale  
1030, avenue du Séminaire  
Université Laval, Québec, Canada

The International Conference on OR for Development (ICORD) aims to bring together researchers from around the world to present and discuss models and methods to overcome issues existing in developing countries. Eleven ICORDs have taken place since 1992 in countries across Asia, South America, Africa and Europe and was held in México City in 2016. In 2017, the ICORD will be held in Quebec on July 13 and 14, immediately prior to the IFORS triennial conference. In the past seven years, the EURO Working Group on OR for Development (EWG ORD) has been a co-organizer of the ICORD.

The workshop format allows participants to present their projects and receive formal feedback from assigned reviewers and comments from the general audience. The reviewers are identified from amongst the pool of participants and their objective is to provide a constructive evaluation of the paper.
The Conference is suitable for presenting papers that are close to submission to a peer-reviewed journal and demonstrate a thorough OR analysis in a problem area important to developing countries. The feedback received at ICORD is an opportunity for authors to improve the quality of the paper in a short time. The problems covered in submitted papers may include, but not be limited to, sustainability, healthcare, energy, mobility, education, natural resource management, public policy and infrastructure. Purely technical papers, or those that have no relevance in the developmental context, will not be accepted, and papers should clearly describe the relevance of the research to development.

Deadline for paper submissions: **March 30, 2017**
Notification of Acceptance: April 15, 2017
Deadline for early registration April 20, 2017

Regular Registration Fee inclusive of materials, snacks and lunches USD 200
Early registration fee USD 150

Other details will be available by end of October, 2016 at the IFORS website, [www.ifors.org](http://www.ifors.org).
Before then, inquiries may be emailed to elise@JGdelRosario.com

---

**EURO Working Group on Transportation**

**20th EURO Working Group on Transportation Meeting**

Budapest, Hungary, 4-6 September, 2017

**Submission guidelines**

Only original papers are considered for presentation at the conference. Abstracts of max 250 words might be submitted by **November 30th 2016**. The papers will be reviewed by independent experts and by members of the program committee.

The Easychair submission page is reachable through the following link:

[https://easychair.org/conferences/?conf=ewgt2017](https://easychair.org/conferences/?conf=ewgt2017)

**Important Dates**

Abstract submission: **November 30th 2016**
Notification of acceptance: January 31st 2017
Full paper submission: March 31st 2017
Early registration: June 30th 2017

**Conference Fee**

Early registration / late registration
full price: 400 EUR / 500 EUR
reduced: 250 EUR / 300 EUR
*plus VAT (if applicable)

**Program**

Technical visits (traffic management centre of Budapest) and lab visits will be prepared. For both evenings of the conference glamorous events with dinner will be organized. On the first evening an elegant restaurant will be visited in the heart of Budapest. The participants will also have the opportunity to enjoy the panorama of the city from a different angle on the other evening.

**Conference content**

The conference aims to bring together experts from the academia, industry and public sector. The conference fee includes: conference attendance, coffee breaks, lunches, evening events with dinner, printed program book and proceedings with full papers in electronic format. Students are eligible for reduced fees.

---

**Conferences and Meetings**

**German Operational Research Society (GOR)**
Workshop on Nonlinear Continuous and Mixed-Integer Nonlinear Programming
Bad Honnef, Germany, 24-25 November, 2016

The 97th meeting of the GOR working group "Real World Mathematical Optimization" is about "Nonlinear Continuous and Mixed-Integer Nonlinear Programming" and takes place at the Physikzentrum in Bad Honnef, Germany, on November 24th and 25th, 2016.

The conference announcement is available at https://gor.uni-paderborn.de/index.php?id=54. You can register for the workshop at https://www.redseat.de/pmo97/.

If you are interested in giving a talk at this workshop, then please contact either Josef Kallrath (josef.kallrath@web.de) or Steffen Rebennack (sreben@mines.edu).

The following speakers have confirmed their presentation:

Radu Baltean-Lugojan (Imperial College London, London, UK) - A Parametric Approach to Solving the Pooling Problem
Prof. Dr. Josef Kallrath (GOR Working Group, Weizenheim am Berg, Germany) - Nonlinear, Con-convex Cutting Stock and Packing Problems
Prof. Dr. Oliver Kolb (University of Mannheim, Mannheim, Germany) - Modeling, Simulation and Optimization on Networks
Dr. Thomas Lehmann (Siemens AG, Erlangen, Germany) - Mixed Integer Quadratically Constrained Optimization Problems in Energy Management Applications for Electro-Thermal Networks
Dipl.-Math. Ralf Lenz (Zuse Institute Berlin, Berlin, Germany) - Applications of MINLP to Gas Network Optimization
Benjamin Müller (Zuse Institute Berlin, Berlin, Germany) - A Branch-and-Price Algorithm for the Recursive Circle Packing Problem
Prof. Dr. Klaus Schittkowski (Eckersdorf, Germany) - A Trust-Region-SQP Algorithm for Mixed-Integer Nonlinear Programming

UK Operational Research Society (ORS)
Young to OR 20 Conference
London, UK, 4-6 April, 2017

www.theorsociety.com/YOR20

Young to OR 20 is the conference to go to for those whose Operational Research (O.R.) careers are less than ten years in duration.

Young to OR is a biennial conference for academics and practitioners with up to ten years of experience in O.R. Attendees have the opportunity to present their work to peers in a supportive environment, while learning about how O.R. techniques have been used in a wide range of applications. Parallel streams of talks are interspersed with presentations from plenary and keynote speakers.

Providing a great opportunity to meet fellow O.R. practitioners, the conference also facilitates sharing of best practice and enables attendees to learn about new areas where O.R. can make an impact. In 2015 there were 16 streams with over 100 papers covering topics from Analytics to advancements in Data Envelopment Analysis, tutorials on MCDM, excellent workshops and much more.

If you'd like to put your mark on Young to OR 20 and run a stream or sponsor or exhibit, please contact our Conference Chair, Kuangyi Liu, at Kuangyi.Liu1@astrazeneca.com or Hilary Wilkes at hilary.wilkes@theorsociety.com.

Operations Research Society of Israel (ORSIS)
POMS International Conference in Israel
Tel Aviv, Israel, 27-29 June, 2017

http://pomsisrael.technion.ac.il/

The POMS International Conference in Israel POMS (Production and Operations Management Society) in cooperation with ORSIS (Operations Research Society of Israel) invite you to attend the 2017 POMS International Conference to be held in Tel Aviv, Israel, June 27-29, 2017. A reception will be held on June 27 and the academic program will be held on June 28 and 29. Optional pre/post tours will be organized for those wishing to experience some of Israel's most important sites.
We are looking forward to meeting you in Bonn! December 13 and 9:30 to 15:30 on December 14.

The conference will be held at Henry-Ford-Bau in beautiful and green Berlin-Dahlem in south-west of Berlin.

You are invited to come to OR2017 to gain insights, share your expertise with others, recruit your next employees or find your next job, or just enjoy meeting new and old friends that work in the intriguing field of operations research, management science, data science and analytics.

More details will follow soon on important dates, the conference format, the streams, the business track, the exhibition, the venue, and the general schedule.

If you have any further questions please contact Natalia Kliwuer, Ralf Borndörfer, and Jan Ehmke who are chairing the program and organizing committees.

The following are important dates (all dates are subject to change):
November 1, 2016 - Publication of the first Call for Papers
March 1, 2017 - Abstract submission deadline
April 1, 2017 - Notification of conditional acceptance to authors
June 1, 2017 - Publication of academic program

For questions about the conference, please contact the conference co-chairs Yale T. Herer and Gal Raz (POMS.Israel@gmail.com); regarding logistics and administrative issues, write to Nilly Schnapp (Nilly.POMS.Israel@gmail.com).

German Operational Research Society (GOR)
OR 2017
Berlin, Germany, 6-8 September, 2017

http://www.or2017.de/

Welcome to the OR2017 Conference - the annual international conference of the German Operations Research Society (GOR). OR2017 will take place in Berlin, Germany, Sept 6 - Sept 8, 2017 at the Freie Universität Berlin.

We invite practitioners and academics from mathematics, computer science, business/economics and other fields to participate. The special focus of the conference in 2017 will be "Decision Analytics for the Digital Economy".

The conference will be held at Henry-Ford-Bau in beautiful and green Berlin-Dahlem in south-west of Berlin.

You are invited to come to OR2017 to gain insights, share your expertise with others, recruit your next employees or find your next job, or just enjoy meeting new and old friends that work in the intriguing field of operations research, management science, data science and analytics.

More details will follow soon on important dates, the conference format, the streams, the business track, the exhibition, the venue, and the general schedule.

If you have any further questions please contact Natalia Kliwuer, Ralf Borndörfer, and Jan Ehmke who are chairing the program and organizing committees.

Workshop "Combinatorial Optimization meets Parameterized Complexity"
Bonn, Germany, 13-14 December, 2016

You are cordially invited to participate in the workshop "Combinatorial Optimization meets Parameterized Complexity" in Bonn on the 13th and 14th of December 2016.

The core of the program is formed by survey talks on topics from parameterized complexity (Dec 13) and combinatorial optimization (Dec 14). Additionally, there will be a small number of shorter contributed talks. We are delighted to announce the following invited speakers for the survey talks:

*Fabrizio Grandoni (IDSIA, Lugano)
*Tobias Harks (Universität Augsburg)
*Bart Jansen (Eindhoven University of Technology)
*Erik Jan van Leeuwen (Max-Planck-Institut für Informatik, Saarbrücken)
*Volker Kaibel (Otto-von-Guericke-Universität Magdeburg)
*Lukasz Kowalik (University of Warsaw)
*Peter Rossmanith (RWTH Aachen)
*Gerhard Woeginger (RWTH Aachen)

Participation is free of charge, but we would like you to register on http://tcs.cs.uni-bonn.de/doku.php?id=research:workshop2016 even if you cannot attend the entire workshop (so that we can order enough coffee). Details on how to register will be made available soon, along with a detailed program. The tentative times of the workshop are 9:30 to 17:30 on December 13 and 9:30 to 15:30 on December 14.

The workshop will take place at Universitätsclub Bonn. The venue is located at Konvikstraße 9, 53113 Bonn.

We are looking forward to meeting you in Bonn!
2017 International Conference on Intelligent Systems, Metaheuristics & Swarm Intelligence (ISMSI 2017)

Hong Kong, 25-27 March, 2017

http://www.ismsi.org

The main objective of ISMSI 2017 is to present the latest research and results of scientists related to Intelligent Systems, Metaheuristics & Swarm Intelligence topics. This conference provides opportunities for the delegates to exchange new ideas face-to-face, to establish business or research relations as well as to find global partners for future collaborations. We hope that the conference results will lead to significant contributions to the knowledge in these up-to-date scientific fields.

Accepted Papers after registration and presentation at ISMSI17 will be published in the International Conference Proceedings Series by ACM, which will be archived in the ACM Digital Library, and indexed by Ei Compendex, Scopus, and submitted to be reviewed by Thomson Reuters (ISI Web of Science).

Selected registered & presented papers with extension (at least, by 30%) will undergo further reviewing & based upon the outcome, may be recommended to be published in the Journal of Memetic Computing (Springer) and Neural Computing and Applications.

Important Dates
Submission Deadline: November 20, 2016
Notification Date: December 20, 2016
Registration Deadline: January 10, 2017
Conference Dates: March 25-27, 2017

Submission Methods
1. To publish the full paper into conference proceedings & give the oral presentations, please send us the full paper.
2. To give a presentation only, please just send us the abstract.

Please log in the Electronic Submission System (https://www.easychair.org/conferences/?conf=ismsi2017); (.pdf only) to submit your full paper and abstract.

For any inquiry about the conference, please feel free to contact us at: sub@ismsi.org

CIAC 2017 (10th International Conference on Algorithms and Complexity)

Athens, Greece, 26-28 May, 2017

http://www.corelab.ntua.gr/ciac2017/

The 10th International Conference on Algorithms and Complexity is intended to provide a forum for researchers working in all aspects of computational complexity and the use, design, analysis and experimentation of efficient algorithms and data structures.

This year there will be a CIAC 2017 Best Paper Award, accompanied by a prize of EUR 1,000 offered by Springer. Submissions co-authored by a member of the "Best Paper Award Committee" are not eligible for the award.

Important Dates
Deadline for submission: November 11, 2016 (extended).
Notification of acceptance: December 20, 2016.
Final manuscript, camera ready: January 31, 2017.

InvitedSpeakers
Giuseppe Italiano, Universita di Roma 2, Italy
Klaus Jansen, University of Kiel, Germany
Christos Papadimitriou, University of California Berkeley, USA

ICAPS 2017 (27th International Conference on Automated Planning and Scheduling)
Pittsburgh, USA, 18-23 June, 2017

http://icaps17.icaps-conference.org

Following the success of the Special Track on Novel Applications at previous ICAPS conferences, ICAPS 2017 will host again a Novel Applications Track.

ICAPS 2017, the 27th International Conference on Automated Planning and Scheduling, will take place in Pittsburgh, USA, 18-23 June 2017. ICAPS 2017 is part of the ICAPS conference series, the premier forum for exchanging news and research results on theory and applications of intelligent planning and scheduling technology.

The goal of this special track is to encourage the submission of papers describing all aspects of the development, deployment and evaluation of planning and scheduling systems for real-world problems.

In order to ensure that papers are reviewed fairly, the track has a separate programme committee consisting of individuals with experience working on applications of Planning and Scheduling technology to real world problems.

Papers submitted to this track will be evaluated using different criteria, particularly:

* Significance of the application problem being addressed
* Importance of P&S technology to solution of the problem
* Novelty of the application and technical approach to the application
* Evaluation of the system and its deployment
* Clarity of the descriptions of the application problem, techniques used, and results
* Applicability to real-world problems such as by dataset complexity and actual use in practice

DEADLINES

18 November 2016 - Abstracts (electronic submission) due
22 November 2016 - Papers (electronic submission, PDF) due
26 January 2017 - Notification of acceptance

The reference timezone for all deadlines is UTC-12. That is, as long as there is still some place anywhere in the world where the deadline has not yet passed, you are on time.

SUBMISSION INSTRUCTIONS

Authors may submit long papers (8 pages AAAI style plus up to one page of references) or short papers (4 pages plus up to one page of references). The type of paper must be indicated at submission time.

All submissions will be made electronically, through the EasyChair conference system: https://www.easychair.org/conferences/?conf=icaps2017

Please direct all questions to icaps17pittsburgh.novelapps@gmail.com

IPCO 2017 (19th Conference on Integer Programming and Combinatorial Optimization)

Ontario, Canada, 26-28 June, 2017

http://www.math.uwaterloo.ca/ipco2017

Submission deadline: November 20, 2016

The IPCO conference is a forum for researchers and practitioners working on various aspects of integer programming and combinatorial optimization. The aim is to present recent developments in theory, computation, and applications. The scope of IPCO is viewed in a broad sense, to include algorithmic and structural results in integer programming and combinatorial optimization as well as revealing computational studies and novel applications of discrete optimization to practical problems.

Authors are invited to submit extended abstracts of their recent work by November 20, 2016; see the conference website for more information. The Program Committee will select the papers to be presented on the basis of the submitted extended abstracts. Contributions are expected to be original, unpublished and not submitted to journals or conferences with proceedings before the notification date (January 31, 2017). Papers violating these requirements will not be considered by the Program Committee.

During the conference, approximately 33 papers will be presented in single-track sessions. Each lecture will be 30 minutes long. The proceedings will be published as a volume of Springer Lecture Notes in Computer Science. They will contain extended abstracts of all accepted submissions. Each participant will receive a copy of the proceedings at the conference. It is expected that revised and extended versions will subsequently be submitted for publication in appropriate journals.
The globalisation of financial markets, the recent impact of the global financial crisis, the creation of new monetary zones and the development of international trade impose new methods in Governance, investment and financing decisions, risk management and Basel II and III, corporate governance, and value creation, Islamic and conventional Economics and Finance and empirical testing. Therefore, it is important to develop new tools to evaluate the changes in risk management at the national and international levels and to review the features of investment, financing decisions, value creation and corporate governance in international economies and in particular in emerging countries and regarding conventional and Islamic Financial Economics. It is also fundamental to implement and use modeling and forecasting techniques for risk management, definition and assessment of investment and financing decisions. Other economic issues could help these decisions, such as Foreign Direct Investments, multilateral strategies, firms' integration within the Mediterranean region. This international conference offers the opportunity to academics and professionals to discuss some issues in international investment and financing decisions.

A separate PhD Workshop is managed.

This international conference includes plenary sessions and parallel sessions. It also plans to include beyond the separate PhD workshop, some poster sessions.

Important Dates
December 30, 2016: Deadline for paper submission.
January 30, 2017: Definitive camera-ready version and registration of authors.

## Schools and Courses

### Winter School on Optimization and Operations Research
Zinal, Switzerland, 15-20 January, 2017

http://transp-or.epfl.ch/zinal/

**Big data and optimization**
Prof. Andrea Lodi, Polytechnique Montréal
Prof. Michael Ferris, University of Wisconsin

The objective of the Winter School is to expose the audience to modern topics on Optimization and Operations Research. Every year, two prominent researchers are invited to provide tutorials on selected topics, and to discuss some of their recent research with the students. Designed for doctoral education, the course is open to academic researchers (professors, researchers, PhD students) and professionals (from industry and public authorities), interested in optimization and operations research.

The course is organized by Prof. Michel Bierlaire, Transport and Mobillity Laboratory (TRANSP-OR), School of Architecture, Civil and Environmental Engineering (ENAC), Ecole Polytechnique de Lausanne (EPFL). It takes place in Zinal, a ski resort in the Swiss Alps. The special environment triggers a specific atmosphere that encourages scientific and personal exchanges among the participants.

In addition to the lectures, workshops will be organized every day where the students will have the opportunity to work on recent papers of the invited lecturers, under their guidance.

### Winter School in Stochastic programming with Applications in Energy, Logistics and Finance
Passo del Tonale, Italy, 15-21 January, 2017

**Topics are:**
* Applications of stochastic optimization and robust optimization
* Modeling in energy, logistics and finance
* Multistage stochastic programming: methods and algorithms
* Risk management
Publications

EURO Journal on Transportation and Logistics (EJTL)

Special Issue: Call for Papers on Advances in Vehicle Routing and Logistics Optimization: heuristics

Guest Editors:
Ch. Guéret, F. Lehuédé, J. E. Mendoza, O. Péton and M. Sevaux

Deadline for submission: November 15, 2016

https://www.euro-online.org/web/pages/1486/special-issues?id=14

The number and quality of talks given at the VeRoLog conference (Nantes) and special track at EURO (Poznan) show that vehicle routing and logistics are still two of the most active research areas for the operations research community. Following these two events, the EURO Journal in Transportation and Logistics organizes two special issues aiming to establish the landscape of the state of the art in the field. The topics covered in these special issues include (but are not limited to):

* Electric vehicle routing
* Stochastic vehicle routing
* Dynamic vehicle routing
* Vehicle routing with synchronization
* Inventory routing
* Multi-objective vehicle routing problems
* Home care routing
* Periodic vehicle routing
* Real-world vehicle routing applications
* Arc routing problems
* Network design
* Bike and car sharing

Submissions are open to all, independent of participation in the conferences. All contributions will be peer reviewed according to the usual standards of the journal.

In order to submit a paper for a Special Issue,
1) Log on the editorial manager using the Author Login.
EURO Journal on Transportation and Logistics (EJTL)

Special Issue: Call for Papers on Advances in Vehicle Routing and Logistics Optimization: exact methods

Guest Editors:
M. Schneider, T. Gschwind and D. Vigo

Deadline for submission: November 15, 2016

https://www.euro-online.org/web/pages/1486/special-issues?id=15

The number and quality of talks given at the VeRoLog conference (Nantes) and special track at EURO (Poznan) show that vehicle routing and logistics are still two of the most active research areas for the operations research community. 3) Choose Article Type, select the desired special issue. The entries corresponding to the special issues start with SI.

European Journal of Operational Research (EJOR)

Special Issue: Call for Papers on Applied to Humanitarian Operations

Guest Editors:
Luk N. Van Wassenhove, Alfonso Pedraza Martinez and Maria Besiou

Deadline for submission: November 30, 2016

Background

Following the 2004 Indian Ocean tsunami, the world has witnessed devastating pandemics, natural and man-made disasters like the Haiti earthquake (2010), typhoon Haiyan (2013), the Ebola pandemic in West Africa (2014), the Nepal earthquake (2015), the war in Syria and the current on-going refugee crisis. Disasters like these put a lot of strain on
the humanitarian system. According to the United Nations Office for the Coordination of Humanitarian Affairs (OCHA) more than $19$ billion was raised in donations in 2015, but the needs were much higher.

Humanitarian organisations (HOs) operate in environments with high uncertainty not necessarily knowing where their next operations will be or what the needs of the beneficiaries will turn out to be. Besides the operational challenges created by this uncertainty, HOs are accountable to donors, who provide funding for disaster response and development programmes, and they are also accountable to the beneficiaries and the international community. They often have to work with the military, the local government and commercial companies to be able to respond to the beneficiaries’ needs. All these stakeholders that comprise the humanitarian system do not all share the same objectives. The operational budgets of the HOs are often tightly constrained and so is the pool of skilled humanitarian aid workers that can operate in such environments.

**Objective of the Special Issue**

Operating under uncertainty, with severe constraints and in an unfamiliar context characterised by stakeholders with conflicting goals, are characteristics of the complex dynamic humanitarian system. OR models and methodologies are certainly of great potential value here. Many researchers looking for interesting problems for analytical modelling have delved into the world of humanitarian operations. However, the models suggested, while being methodologically rigorous have frequently lacked solid anchoring in reality. This has obviously limited their practical relevance.

The objective of this special issue is to publish rigorous research that is well-grounded in practical foundation, for example by using real data, assumptions that are convincingly grounded in reality, looking for solutions to specific problems that the humanitarian system is facing, discussing how the results are validated and can be used in the field.

We are particularly interested in papers that develop conceptual and OR models studying the complexity humanitarian operations are facing. We also welcome methodological and more abstract research provided it is clearly motivated by a practical problem.

The studies should be anchored in practice and clearly discuss how they can be used in the field, preferably by showing evidence of interaction with humanitarian practitioners. Papers should explicitly describe the problem context justifying the data used.

We are looking for rigorous studies that present relevant and original work in humanitarian aid, welcoming different disciplines and methodologies. To fit the mission of the special issue, the papers should have a solid practical foundation and should fit in one or more of the following categories:

1. Papers well-grounded in practical foundation that manage to go beyond applications of existing methods by showing how the special context of humanitarian operations requires a different approach from a pure commercial OR application.
2. Empirically-grounded analytical modelling papers.
3. Papers that use multiple methods for triangulation purposes, such as case studies, interviews, etc.
4. Multidisciplinary papers that have a solid practical foundation.

Authors should explicitly indicate which category or categories they fit. Papers that do not fit the special issue will not be invited to continue the review process. We will seek the participation of practitioners to confirm that the papers are looking for solutions to specific problems that the humanitarian system is facing, that their assumptions are convincingly grounded in reality, and the results can be used in the field.

**Paper Submission**

Papers should be submitted following EJOR submission guidelines. The submission website for this journal is located at: [http://ees.elsevier.com/ejor](http://ees.elsevier.com/ejor). To ensure that all manuscripts are correctly identified for inclusion into the special issue, it is important that authors select "SI: Humanitarian Operations" when they reach the "Article Type" step in the submission process.

---

**Discrete Applied Mathematics**

**Special Issue: Call for Papers on Computational Advances in Combinatorial Optimization**

**Guest Editors:**

Tibor Jordán, Tamás Kis, Silvano Martello

**Deadline for submission:** November 30, 2016

This special issue will present recent advances in all areas of Combinatorial Optimization. The issue will be based on contributions presented at ECCO XXIX (Budapest, May 26-28, 2016), but the invitation to submit is extended to all ECCO
and CO members.

Main topics of interest are (but not restricted to):
* Approximation algorithms
* Exact algorithms
* Graphs and networks
* Heuristics
* Mathematical programming
* Metaheuristics
* Scheduling

All articles will be thoroughly refereed according to the high standards of Discrete Applied Mathematics.

The full papers must be submitted through the Elsevier Editorial System http://ees.elsevier.com/dam. When submitting your paper, be sure to specify that the paper is a contribution for the Special Issue of ECCO-CO, so that your paper is assigned to the guest editors. Please see the Author Instructions on the site if you have not yet submitted a paper through this webbased system. Be sure to note that your work is intended for the Special Issue and to select the article type Special Issue: SI: ECCO2016.

Accepted papers will be published online individually, before print publication.

We are looking forward to receiving your contribution.

---

**European Journal of Operational Research (EJOR)**

**Special Issue: Call for Papers on Extending the OR Horizons**

**Guest Editors:**
Daniele Vigo and Joanna Józefowska

Deadline for submission: **December 31, 2016**

In the last years a strong and continuous innovation trend has interested Operational Research and new promising research and application horizons have open to scientists in this field of research. On the one side many classical techniques have reached the maturity and provide a solid background for the development of models and applications, on the other hand more and more challenges and opportunities are open due to the enormous availability of data and the strong need to turn them into decisions. As often happens many innovation paths in Operational Research come from the integration of different cultures such as data science, analytics, mathematics, economics ... providing original approaches by changing the viewpoints and favouring cross-cultural hybridization. The 28th European Conference of Operational Research, which took place in Poznan from July 3 to 6, 2016 has collected numerous examples of such new pathfinders research initiatives. The aim of this special issue is to collect high quality examples of methodologies that will form the backbone of the future Operational Research in the 21th century.

**Manuscript Preparation and Submission**

Submitted manuscripts will need to conform to the usual high standard requirements of EJOR and will be peer reviewed as normal. Prospective authors are asked to follow the EJOR guide for authors and submit their papers via the EES (http://ees.elsevier.com/efor).

**Publication Schedule**

Paper Submission Due: **December 31, 2016**
Final Decision: June, 2017.
We plan for the special issue to be published by the second half of 2017

---

**Annals of Operations Research**

**Special Issue: Call for Papers on Advances in Theoretical and Applied Combinatorial Optimization**
Increasingly complex workplaces and non-work situations.

Processes in group decision support by multiple individuals and larger entities is a required capability for facing increasingly complex workplaces and non-work situations.

Although interest in understanding group decision support has historically focused on evaluation of the efficacy of group support activities, the current interest recognizes that group decision support initiatives, and their associated organizations, communities, networks, and systems, carry out group decision support processes through a social process that is engrained with affect, emotion and social interactions. Understanding of these and other micro-processes in group decision support by multiple individuals and larger entities is a required capability for facing increasingly complex workplaces and non-work situations.

Group Decision and Negotiation

Special Issue: Call for Papers on Micro-Processes in Group Decision Making

Guest Editors:
Fran Ackermann, Leroy White, Mike Yearworth

Deadline for submission: January 31, 2017

http://static.springer.com/sgw/documents/1585471/application/vnd.openxmlformats-officedocument.wordprocessingml.document/Call_Micro-ProcessesInGDN.DOCX

There is a growing interest within one part of the field of group decision support research towards a more detailed investigation of group decision support practices. This interest is, in part, reflected in the GDN conference streams which took place in Warsaw (2015) and Bellingham (2016).

The research recognizes the need to develop an in-depth understanding of what occurs in the milieu of group decision-making processes, in particular in the relationships between the social, behavioral, and the material entities. We refer to these relationships as micro-processes which take the form of a portmanteau for a burgeoning stream of different but related research that focuses on practices and routines for supporting decision making in groups and society. This focus also emphasizes the connections among the entities involved in group decision support activities, including but not limited to the role of facilitation and modeling in negotiating decisions.

Authors should submit a cover letter and a manuscript by November 30, 2016, via the Journal's online submission site. Manuscripts submitted after the deadline may not be considered for the special volume and may be transferred to a regular volume.

Please see the Author Instructions on the website if you have not yet submitted a paper through Springer's web-based system, Editorial Manager. Be sure to note when leaving a comment that your work is intended for the special volume and to select the article type "S.I.: Advances in Theoretical and Applied Combinatorial Optimization". Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.

Instructions for authors can be found at:
http://www.springer.com/business/operations+research/journal/10479

We are particularly interested in articles describing studies that integrate mathematical rigor with efficient heuristic design, new facets of integer programming, network design, and complexity theory. Mathematical formulations and efficient heuristics that deal with current application areas such as the environment, green logistics, and big data are also encouraged.

This is a call for papers that make a significant contribution to the topic 'Combinatorial Optimization'. It is open to all researchers of this area. We would like to encourage, in particular, all participants of the International Symposium in Combinatorial Optimization CO2016 (Septembre 1-3, University of Kent, Canterbury, UK) to submit extended versions of their presented papers.
This special issue recognizes the need for research to advance theory and practice about how best to enhance group decision support as well as a need for novel ways for empirical testing and refinement. A number of initiatives are beginning to show promising results. For example, recent research has been providing insights into the antecedents and outcomes of group interaction that is shared or based in group processes and also contingencies on these relationships. A current focus of group decision support and the associated analytical techniques seeks to understand, and so develop methods, for group decision making that is distributed, shared, networked, fluid, and constructed in interaction.

This special issue calls for the submission of scholarly papers that introduce novel studies concerning the group decision support processes. Submissions could address any of the following:

1. The types of groups involved, whether they are:
   a) on-going interventions or one offs,
   b) single organization or multi-organizational collaborations, and
   c) public/not-for-profit organizations or private.
2. Micro-process understanding that will help with transparency and transferability: the teaching of group support methods and concepts.
3. Advances in the ways of collecting and analyzing data about group support interventions. Research papers that use data in a range of forms (logfiles, videos, models etc.) are of particular interest.
4. Organizational or situational factors influencing group decision support application. For example, studies that take a longitudinal perspective with a focus on group decision development.
5. Going beyond traditional approaches, that is, the development, illustration, and application of new research methodologies for studying group decision-making processes, with a particular focus on virtual/distributed systems.

Theoretical, methodological, and empirical articles employing rigorous quantitative or qualitative methods with a focus on a micro-process understanding of group support are welcome.

This Special Issue is particularly aimed at attracting papers from a wide range of geographical locations to ensure the broadest possible range of contributions. While the debates on micro processes of GDN have been especially pertinent in the European context, this Special Issue aims to address the issues as a topical or emergent area in the Americas, Africa, and Asia and Pacific region. Contributions from these regions are, hence, particularly welcome.

In order for the special issue to show an integrated, but not necessarily consensual, view of the field, the editors expect authors of accepted manuscripts to make strenuous efforts to present their papers at the next GDN conference in Stuttgart 14-18 August 2017. Extended abstracts of the papers will appear in conference proceedings and the conference will provide an opportunity for final revisions in the light of conference discussions and likely relationships to other accepted papers.

The editors invite preliminary discussions from potential authors.

RAIRO-Operations Research

Special Issue: Call for Papers on Operations Research Applications in Industry

Guest Editors:
Alain Quilliot, Rosa Figueiredo, Serigne Gueye

Deadline for submission: February 1, 2017

We invite submissions of articles for a forthcoming issue of RAIRO-Operations Research on Operations Research Applications in Industry. This special issue will be dedicated, both, to the 117th European Study Group with Industry, that has been held in Avignon, France, May 23-27, 2016, and to the Industrial Days organized each year by GDR RO (CNRS). However, it is also open to papers which have not been presented in any of these two events.

High quality papers, dealing with any real-world industrial issues and using intensively Operations Research Approaches, are solicited.

Applications of interests may include, but are not limited to:
*Airline Industry: routing and flight plans, crew scheduling, revenue management, etc.
*Telecommunications: network routing, queue control, etc.;
*Manufacturing Industry: inventory control, production scheduling, capacity planning, etc.
*Healthcare: hospital management, facility design, etc.
*Transportation and logistics: traffic control, network flow, location planning, etc.
*Cloud Computing.
*etc.
The theoretical background of interests of these applications includes but is not limited to:

* Mathematical Programming
* Linear and integer programming
* Non-linear programming
* Quadratic Programming
* Graph and network algorithms
* Multiobjective optimization
* Stochastic and robust programming
* etc.

The submissions will be managed electronically. All submissions will be refereed according to the high standards of the journal. Further details can be found on the RAIRO-Operations Research website. Information about RAIRO-Operations Research including author instructions is available at:

http://www.editorialmanager.com/ro/

Additional information about the special issue can be obtained from the Guest Editors.

Annals of Operations Research

Guest Editors:
Sergio Maturana, Roger Z. Ríos-Mercado, and Jorge Vera

Deadline for submission: March 1, 2017

The Annals of Operations Research seeks submissions for a special issue on "Operations Research and Systems: XVIII Latin-Iberian-American Conference on Operations Research, CLAIO 2016". We invite all participants of CLAIO 2016 to submit the extended full version of their presented contributions to this special issue. Papers not presented at the conference but that contribute to a better understanding of the significant impact analytic OR models and methodologies have had in Latin-Iberoamerica are also welcome, thus this is open to the OR community worldwide.

All manuscripts must be written in English and prepared in accordance with the journal's instructions for authors available at the journal web site. Authors should submit a cover letter and a manuscript by March 1st, 2017, via the Journal's online submission site at: www.editorialmanager.com/anor/default.aspx. Within the Editorial Manager, please choose “S.I.: CLAIO 2016” as the article type. Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.

Contact information of coordinating guest editor: e-mail: jvera@ing.puc.cl

Competitions, Prizes and Awards

IFORS Prize for OR in Development

http://ifors.org/web/2017-ifors-prize-details-announced/

IFORS is pleased to announce that the Prize will be awarded during the 21th Triennial conference on "OR/Analytics for a better world" to be held in Quebec City, Canada from 17-21 July 2017.

* Awarded at the close of the IFORS Triennial Conference and carries with it a grand prize of US$ 4,000.00 and a runner-up prize of US$ 2,000.00

* The finalist papers are automatically considered for publication in the IFORS Publication, International Transactions in Operational Research (ITOR). Publication is contingent upon the usual refereeing process. Authors of these papers
EURO Working Group on Sustainable Supply Chains
PhD Thesis Award on Sustainable Supply Chains

The EURO Working Group on Sustainable Supply Chains is announcing the call for nominations for the best PhD thesis in the field of "Sustainable Supply Chains". The PhD thesis should be predominantly on applications of operational research techniques in the field of Sustainable Supply Chains. The thesis must have been examined and approved by a European university between January 1, 2015 and December 31, 2016.

Application
Candidates must submit an application via email to the EWG on Sustainable Supply Chains (SustainableSC@om.rwth-aachen.de) by the deadline of the competition (January 31, 2017) containing the following information:
* An executive summary of the PhD thesis highlighting the relevance of the work for the topics of the EWG-SustSC of not more than 1,000 words,
* an electronic copy of the PhD Thesis,
* a letter from their main PhD supervisor recommending the candidate for consideration for this award and confirming that the candidate meets the criteria for eligibility for the competition, and
* a certificate of the university confirming the final approval of the thesis.

Deadlines

**VeRoLog solver challenge 2016-2017**

[https://verolog.ortec.com/](https://verolog.ortec.com/)

This challenge started officially during the VeRoLog meeting in Nantes (June 2016) and ends at the VeRoLog meeting of 2017. The challenge is proposed, sponsored and run by ORTEC.

The problem being addressed combines aspects from scheduling, routing and inventory and arises from practice. In the format used for the challenge the instances are simplified for the sake of clearness but they preserve the essence of the difficulties. This problem, defined over a period of several days, differs from inventory routing in being completely deterministic and in that the inventory concerns reusable equipment.

There is a Routing challenge faced by a herd (cattle) improvement company.
Task: regularly measure the quality of milk samples at customers (farmers)
*Multi-day planning*
*The farmer can request tools for a number of days*
*Time windows on the delivery day of tools*

The Challenge will run till **June 1, 2017**

---
