

IBM Data Science & AI Elite Team

Sales and Operations Planning (S&OP) at ÇİMSA

3rd conference of the EURO Working Group on the Practice of OR
Challenges in the deployment of OR projects

Eray Cakici
October 12, 2020

Agenda

1

CimSA S&OP Project

Overview

Solution Approach

Achievements

2

Challenges in the deployment of OR projects – CimSA case

Challenges

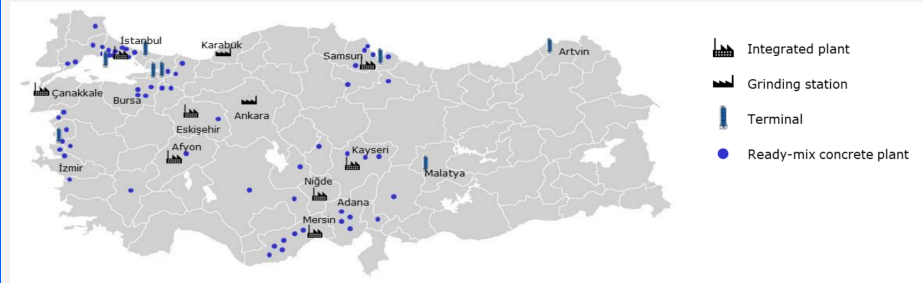

Solutions

ÇimSA

- World leader in white cement
- 15+ grinding mills, 10+ kilns, 30+ silos in 15 Locations
- \$400M+ revenue/year
- Core strengths in high quality special cement products and strong network structure

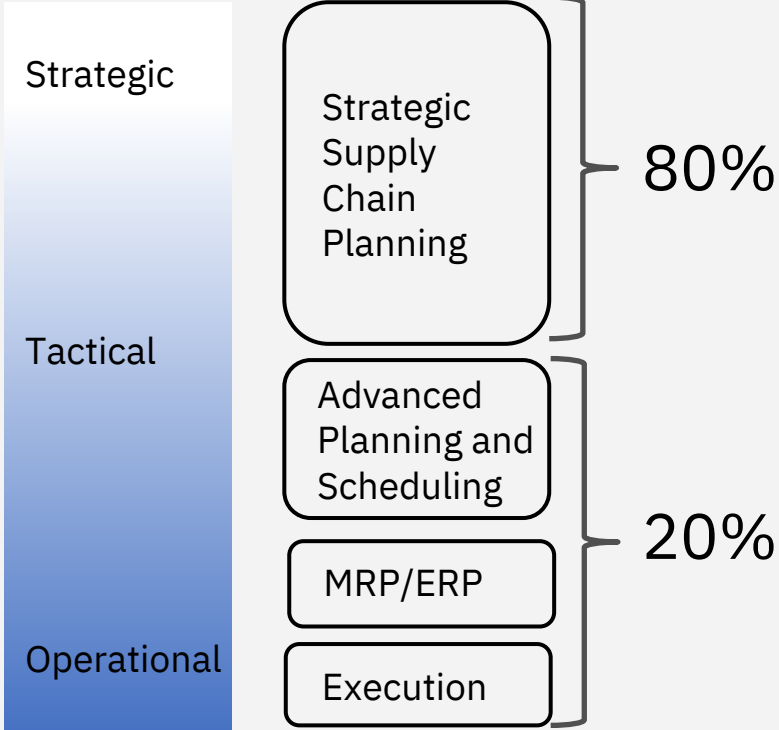

CimSA Supply Chain... 10.000 ft look

Sabancı Cement Group - Turkey

Supply Chain Optimization

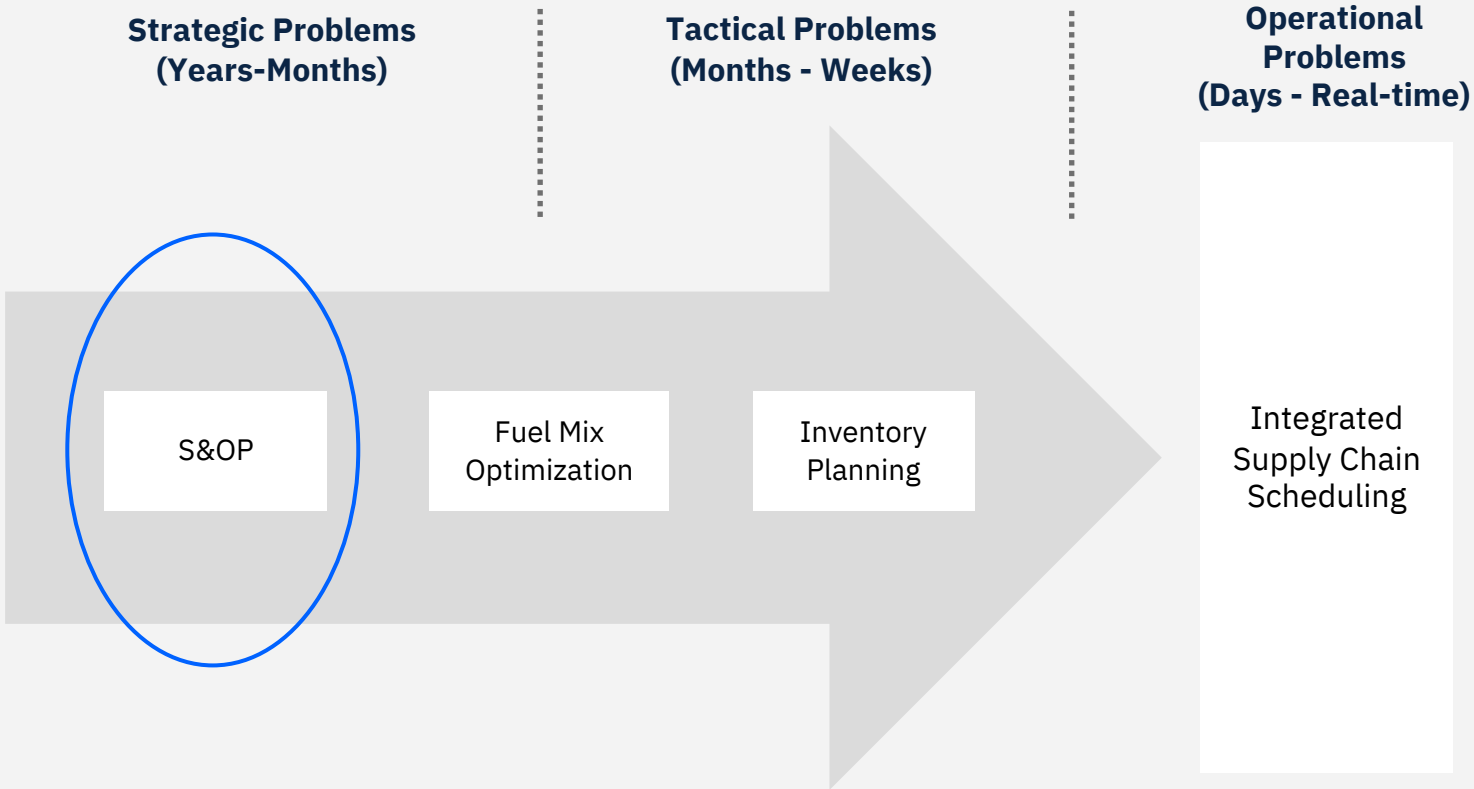

The majority of a supply chain's lifecycle costs are locked-in at the start

Such "up-front" decisions include:

- Distribution Network
- Inventory Locations
- Supplier Network
- Inventory Levels
- Logistics Suppliers

Source: AMR Research, BCI

ÇİMSA & IBM Optimization Use Cases

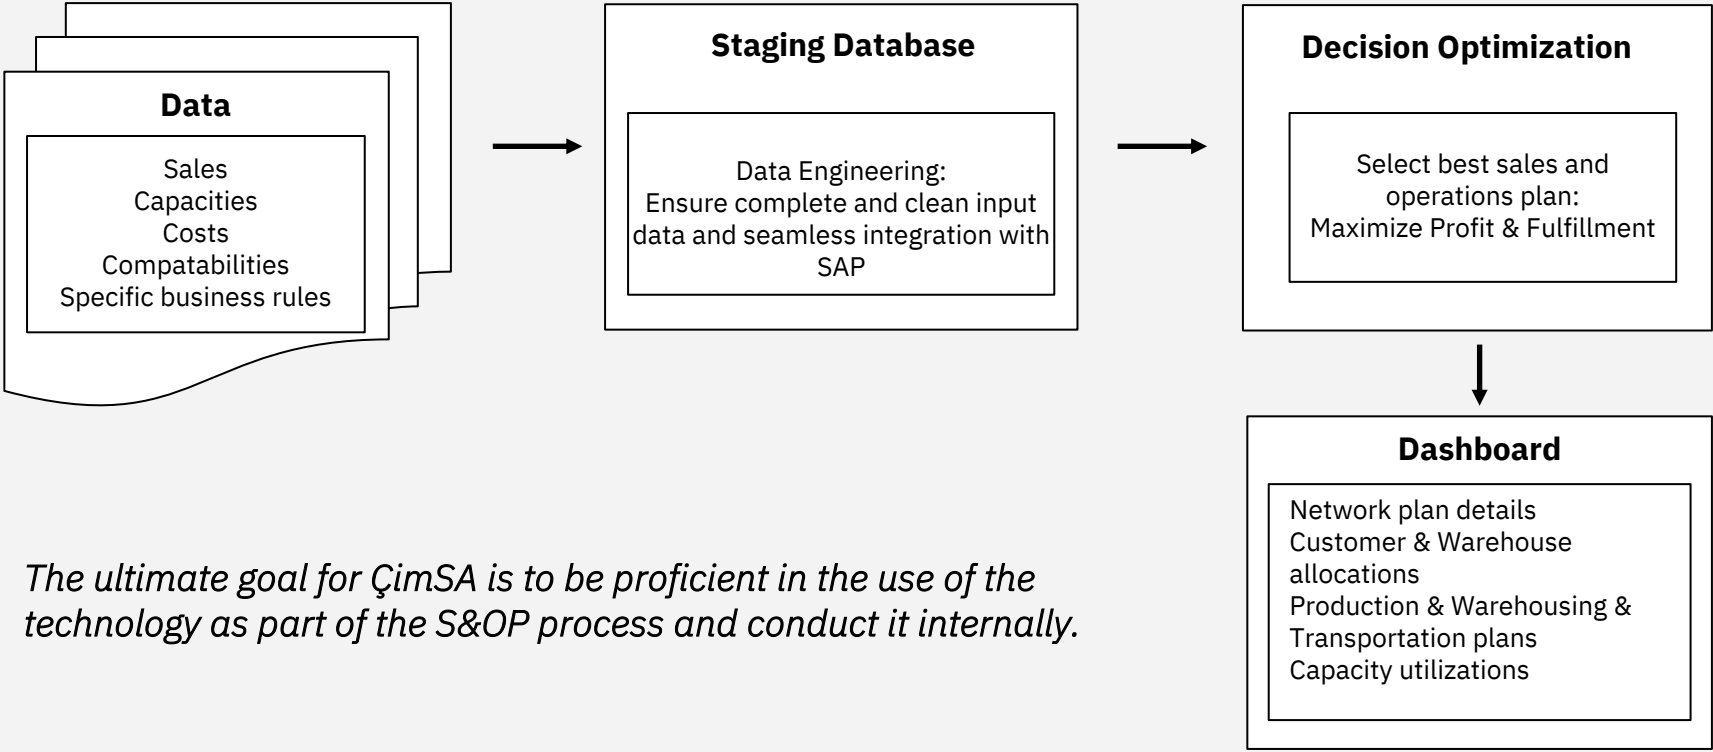

Sales and Operations Planning at ÇİMSA

CimSA S&OP team meets with executives every week to decide on:

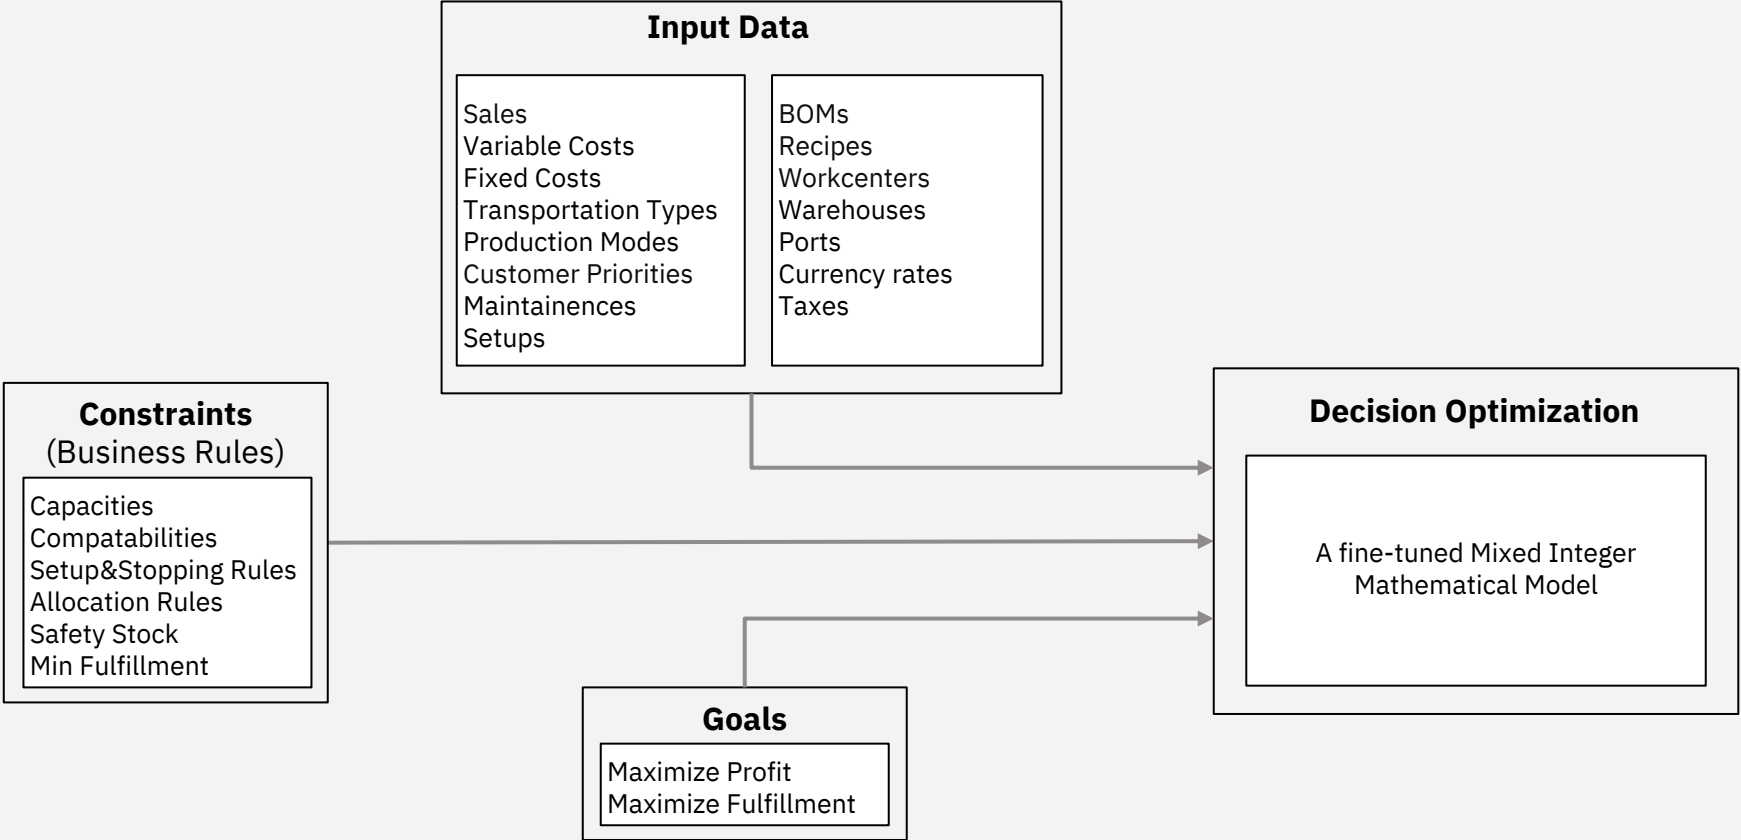

- Sell / Not to Sell Decisions
- Order-Facility Assignments
- Customer Service Levels
- Inventory Levels
- Production Modes (High/Medium/Low speed)
- Line Conversions (white vs gray in certain kilns)
- Maintenance & Balancing Stops
- Plan for Next 24 Months

Solution Approach

The ultimate goal for ÇimSA is to be proficient in the use of the technology as part of the S&OP process and conduct it internally.

Model Design Details

Managing Supply Chain Risk

We've to do more with less

and we've to run many "what-if" scenarios

Business challenges

- Integrated production and distribution decisions
- Multiple-objectives
- Complex business rules
- Capacity bottlenecks
- Dynamic market conditions
- Manual processes

Business benefits

- Supply chain cost reduction expected by 5-10%
- Better customer service
- Visibility of planning results
- An automated and optimized decision support system with what-if scenario analysis capabilities

Developed solution

Technical perspective:

- A staging database is fully integrated with Cimsa's SAP system
- Custom web-based user interfaces
- Cplex is embedded into the custom developed application

Model perspective:

- A mixed integer mathematical programming model
- Parameter tunings
- Warm-start and new multiple-objective features

Challenges in the deployment of OR projects – CimSA case

DATA

Collection ✓

Validation ✓

Preparation ✓

Generation ?

SCOPE 

Optimize ALL

or at least MORE

TRUST

How do I know your solution is optimal?

DURATION

- Political Movements i.e. Arab Spring 2010-2012

- Floods i.e. 2011 Thailand

KORDSA

- Pandemics i.e. 2020 Covid

ÇIMSAS

- Team Changes i.e. Ginni Rometty retirement

SOLUTIONS

- AI/ML → Data Cleanness & Completeness & “Generation”
- Decomposition → Scope
- Visualization & Reporting & What-If Analysis → Trust
- Stay Calm → Duration

Wrap Up

We had challenges AND

- We've got the right “team”
 - The right “approach”
 - The right “optimization tool”
 - There continue to be great opportunities...
